

H5P Interactives are Shareable

How To Make Your H5P Shareable

To allow others to edit your H5P interactive, they must be able to download it and create their own editable version.

To enable downloading:

1. Enter **Edit Mode** in the H5P interactive you want to share
2. Scroll down to the bottom and ensure “**Allow users to download the content**” is selected

You'll know it's set to be reused if a Reuse link appears in the bottom-left corner of the interactive.

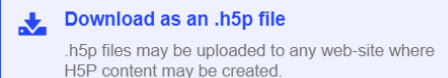

Edit an Existing H5P Interactive

To edit someone else's interactive, you'll need to download it, then upload it to your own H5P account.

1. Download the H5P interactive

1. At the bottom-left corner of the interactive, click the **Reuse** button.
2. Select **Download as an H5P file**

2. Upload the H5P interactive

1. Go to the [H5P website](#), click **Add Content**
2. Select **Upload**

That's it!

Create or Upload Content *

H5P hub Select content type

☐ Create Content ☒ Upload

Upload an H5P file.

No file chosen

Open your lesson, click where you want the interactive to go, select the "Insert Stuff" icon, scroll to H5P, then browse for and insert your new interactive.

 Your changes will *not* affect the original creator's version.
